What we're looking to add to our team:

Our Senior Quality Assurance Analyst will be responsible for testing our SaaS web application and should be comfortable with the latest testing techniques and tools. An ideal candidate will be a senior-level QA professional with experience in testing SaaS products and test automation.

What you'll do:

- Conduct functional and non-functional testing of a state-of-the-art SaaS web application to support peer-to-peer fundraising
- Collaborate with product development to understand user stories and create test plans
- Develop test automation to increase the efficiency and effectiveness of QA processes

What we're looking for:

- Bachelor's degree or equivalent preferred
- 5+ years of quality assurance expertise
- 3+ years of QA experience for SaaS web applications
- Strong analytical skills and problem-solving skills
- Ability to work independently in a distributed team setting and a startup environment
- Experience with testing API integrations across cloud-based services
- Experience with test automation tools (such as Selenium)
- Experience with agile development practice
- Experience with development workflow tools (such as Jira and Github)

Extra credit for:

- Experience with SQL and NoSQL databases
- Experience with performance testing
- Experience with microservices and DevOps

Comps & Perks:

- Ability to work remotely
- Competitive salary
- Incentive stock options
- Full range of benefits, including 401(k) and medical, dental and vision coverage
